JCI Interconnects, Forms First MVNO with DoCoMo 3G

On December 7, 2007, Japan Communications Inc. (JCI) completed an Interconnection Agreement with NTT DoCoMo, Inc. (DoCoMo), becoming the first MVNO established through interconnection with the DoCoMo 3G network.

In July 2007, to provide MVNO services over DoCoMo 3G mobile phones, JCI formally requested interconnection to the DoCoMo i-mode Packet Switch for mobile devices. Since then, both parties have moved forward on efforts to implement this interconnection, including connection tests. Connection was confirmed in testing on December 7, 2007. The Interconnection Agreement was concluded later that day and was sealed today.

With this interconnection, JCI has acquired the 3G network necessary to offer the *PC→Phone* service, which allows corporate email to be sent and received from mobile phones, and *tangomail*, which will bring e-mail portability to mobile phones.

About JCI

Japan Communications Inc. (JCI) was the first to introduce the Mobile Virtual Network Operator (MVNO) business model to the world in 1996. JCI, a publicly listed company in Japan (JPN-9424), is the first and the largest data MVNO in the world. It has pioneered wireless data solutions, which address particular needs of specific customers both in consumer and enterprise markets. Operating as an integrator of wireless and fixed network services with information technology, it is the leading provider of end-to-end wireless data solutions.
