CEO Succession

And

Appointment of another Representative Director

Japan Communications Inc. (JCI, TSE Prime:9424) hereby announces that at the Board of Directors Meeting held today, it was determined that Naohisa Fukuda, Representative Director-President would succeed the CEO position from Frank Seiji Sanda, Founder CEO. At the same time, JCI will appoint Ms. Akemi Kato as Representative Director-Executive Managing Director as of June 25, 2025, on the premise of the resolution of the 29th Ordinary General Shareholders Meeting and the Board of Directors Meeting to be held on June 25, 2025.

Frank Seiji Sanda, Representative Director-Chairman, founded the Company on May 24, 1996, and led JCI as CEO for 29 years. He created and actually realized the MVNO business model first time in the world and laid the foundation for MVNO business in the world and in Japan, which has yielded 1,991 companies in Japan (according to the statistics by Ministry of Internal Affairs and Communications as of the end of December 2024) and countless numbers of companies in the world.

JCI agreed with NTT DOCOMO, INC. about the interconnection with its voice and SMS network in February 2024 and working on at rapid pace to start new service on May 24, 2026. JCI calls the MVNO business model that to be realized by interconnection of all the mobile communication network such as data, voice, and SMS, as “Neo-Carrier,” and JCI will become the Neo-Carrier first in Japan. By becoming a Neo-Carrier, JCI will have no more various restrictions on technical and

institutional aspects in the current business model and can creatively produce JCI's new services. At the same time, it becomes possible to continue to use all three mobile communication networks on a cost basis.

Also, under the new business strategy (released on January 22, 2016) launched by Naohisa Fukuda, Representative Director-President immediately after his appointment of the President, JCI developed JCI's patented technology, "FPoS" (Fintech Platform over SIM) for using the internet in safety and security and accredited under the Electronic Signatures Act first in an electronic certificate installed on smartphone. Today, the damages caused by unauthorized use is becoming huge in various fields such as finance, payment or else via internet, the value of FPOS has been recognized properly. JCI believes we cannot use the internet in safety unless this technology spreads and is working on earnestly to make FPOS de facto standard in Japan.

Naohisa Fukuda, Representative Director-President leads the Neo-Carrier Project as well as for making FPOS de facto standard in Japan. In order to officially appoint CEO, JCI defines the CEO position in the Articles of Incorporation, which states that CEO will take on a role of convocation and chairperson of the General Shareholders Meeting and the Board of Directors Meeting.

Frank Seiji Sanda, Representative Director-Chairman, continues to lead U.S. business, which was founded right after JCI was established in 1996. He will work to establish the foundation of business in U.S. with a plan to IPO within five years by enhancing and expanding CBRS business (Citizens Broadband Radio Service) that developed in U.S. up to now and by adding the leverage of JCI's Neo-Carrier strategy and FPOS strategy.

With this change in CEO, Akemi Kato, who has been responsible for the legal department since JCI's founding, will be appointed as the Representative-Director Executive Managing Director. With this appointment, JCI will be led by three Representative Directors.

<New Representative Directors>

On the premise of the resolution of the 29th Ordinary General Shareholders Meeting and the Board of Directors Meeting to be held on June 25, 2025.

About Japan Communications Inc. (JCI)

Japan Communications Inc. (JCI), founded in 1996, is a pioneer who created the MVNO market and has brought innovation to the telecommunications industry. While JCI has established a stable profit model in their major business, simple and rational mobile communication services, JCI is aiming for further growth. JCI has strengths in patented technologies such as the mobile leased line "Closed SIM-to-SIM Communication" and the digital authentication technology "FPoS," and is focusing on providing mobile communication services and digital authentication infrastructure based on the authentication technology. The PCI DSS-certified mobile leased line is adopted by high-security sectors, such as police and bank. The FPoS supports security at the highest global standards and convenience. Under the mission of "carrying bit in safety and security," JCI is aiming for developing social infrastructure such as secure mobile environment beyond national borders and is working on sustainable growth and improving corporate value.
